PAUL OTULAJA

Senior AI/ML Engineer | Generative AI & ML Systems | Python

Lagos, Nigeria | +234 816 686 0133 | paulotulaja@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

AI/ML Engineer and Data Scientist with 6+ years of experience building production AI systems, machine learning solutions, data pipelines, and analytics applications. Strong Python and statistical foundation with hands-on experience in Generative AI, RAG, agentic systems, LLM tool calling, AI automation, REST APIs, Docker, databases, and cloud environments. Experienced working across product and engineering contexts to turn business requirements into scalable AI-powered systems. Project experience in fraud detection and risk modelling, with a focus on imbalanced classification, model evaluation, and practical ML deployment.

CORE TECHNICAL SKILLS

Programming & ML: Python, TensorFlow, Keras, PyTorch, Pandas, statistical analysis, predictive modeling

Generative AI & Agents: OpenAI, Hugging Face, LangChain, CrewAI, OpenClaw, RAG, tool calling, AI assistants

Backend & Data: FastAPI, REST APIs, MySQL, PostgreSQL, MongoDB, Redis, data pipelines

Cloud & DevOps: Docker, AWS, GCP, OCI, GitHub Actions, CI/CD

PROFESSIONAL EXPERIENCE

AI Developer — Divverse LLC (Remote) | Dec 2023 – Present

- Built an agentic system using CrewAI to automate client workflows and improve operational efficiency.
- Developed a RAG-based chatbot for a med-tech institution, achieving 97% inference accuracy.
- Engineered agentic workflows supporting both linear and dynamic orchestration for scalable automation.
- Integrated AI systems with MCP clients and servers to support multi-agent communication.
- Exposed AI/backend services through RESTful APIs and deployed containerized solutions with Docker.
- Developed a WhatsApp message-delivery workflow using OpenClaw to improve operational communication.

ML/AI Developer — Loubby AI (Part-time) | Dec 2023 – Jul 2025

- Engineered Dara, an AI interviewer integrated into the Loubby AI platform for automated HR assessments.
- Collaborated on Jabari, an actionable AI assistant designed to improve platform navigation and user interaction.
- Contributed to RAG functionality for improved context retrieval in AI assistants.
- Developed multi-user memory systems and optimized AI assistant memory for persistent context.
- Implemented OpenAI tool calling to enable dynamic, context-aware agent actions.

Data Analyst — KnowledgeSquare Foresight, Lagos | Jan 2021 – Oct 2023

- Maintained organizational databases for security, consistency, and reliable data operations.
- Communicated analytical results to team members and leadership, contributing to a 30% productivity improvement.
- Connected MySQL databases to R for data manipulation, analysis, and visualization.
- Developed a performance-monitoring dashboard using Shiny and ggplot2.
- Performed reconciliation of reports and payments for centers across 50+ countries.

Freelance Data Scientist — Fiverr (Remote) | Dec 2018 – Aug 2023

- Debugged complex code to improve functionality and statistical correctness.

- Created data pipelines for data cleaning and preprocessing.
- Developed machine learning models for price prediction with relatively low MSE and R-squared close to 1.
- Conducted statistical analyses and produced research reports using Python and R.
- Built AI chatbots and task-oriented AI assistants using LangChain and LLaMA.

EDUCATION & CERTIFICATION

B.Tech, Statistics
Federal University of Technology, Akure

Machine Learning in Production
Coursera – DeepLearning.AI
Validate Certificate

R Programming
Coursera - Johns Hopkin's University
Validate Certificate
